Compatible with all telephone systems

Change your Telephone System Holding Time in a Business Communication Opportunity

A lot of people are calling your Business everyday. How do you take care of them ? What kind of perception do you want them to have ? The perception the customer has on the contact is essential because at least 80% of your business is done over the phone.

- Select your background music from your musical collection (MP3/WAV)
- Create musical lists by themes, styles or as you like
- Message automatically repeated at a frequency of your choice
- Easy maintenance
- Easy to install
- Easy to use

This software allows broadcasting of all kinds of information, such as commercial, promotional or institutional messages; and it is very easy to update.

Activation in 4 easy steps!

- 1- Connect your telephone system audio jack into your computer's audio jack
- 2- Install the software
- 3- Choose your background music
- 4- Record your waiting message

... and you are in business!
