

# REC

# Compatible with all telephone systems

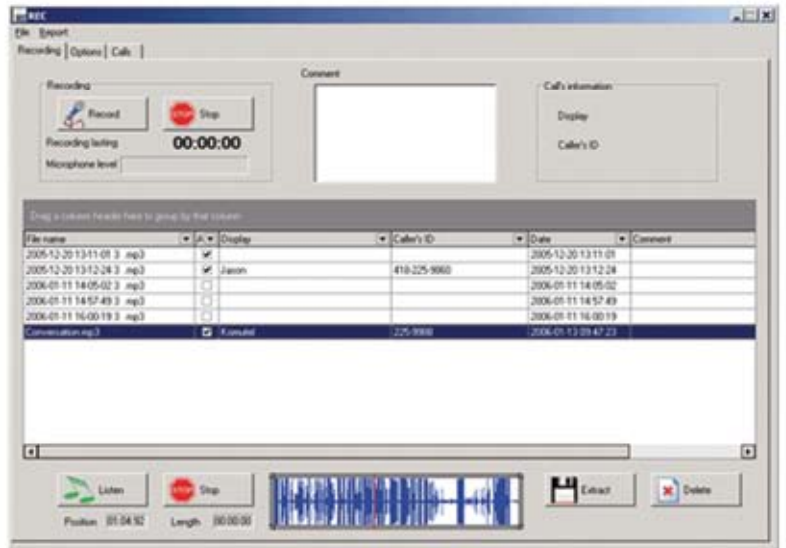

## RECORD your Telephone Conversations

Recording your telephone conversations with REC is so easy. It allows you to create WAV or MP3 files, to name them, to classify them and to listen to them when needed. Also, you can print file lists according to your own criteria's.

### EASY INSTALLATION!

Connect the adapter between your telephone handset or headset and your computer audio card.

## You are ready!

## RECORDING OPTIONS

REC can automatically or manually be activated receiving a call or when using REC in conjunction with a Komutel telephone system product. It can also be activated from the displayed telephone number (C.L.I.D.) or from the number dialled by the caller (D.N.I.S).

- Reminder configuration so the user does not forget to inform the customer that their conversation will be recorded
