

NOTIFICATION SOLUTION

OVERVIEW

The notification app makes it possible to respond appropriately to security and crisis management requirements, to issue alerts and to mobilize people in the event of a crisis, major or imminent incident.

While the large telecom companies announce the cessation of their paging service, Komutel understands the considerable impact that this decision may have on some organizations, including health facilities or mining companies that cannot use their cell phone at some depths.

The Notification solution allows you to quickly reach a group of people by phone calls, SMS or pre-recorded e-mails and to manage all the steps of the process. It guarantees the communications and offers a balance sheet of the actions undertaken. Communicating quickly and efficiently is essential.

Joining a large pool of people in a few simple steps saves valuable time in distributing information of general interest.

Recipient feedback is also possible, allowing users to poll people's opinions, inform them and receive confirmations of presence or absence at an event.

The versatility and ease of use of this app also allows you to send reviews, general interest messages, announcements and poll questions to targeted groups.

USE

- ▶ Mining companies: Notify your workers, your subcontractors and the population of blasting, shutdown or other
- ▶ Health sector: Joining forces during an emergency
- ▶ School Boards: Reaching users during school closures caused by bad weather
- ▶ Financial sector: Reach clients for information requests or to inform them of transactions on their accounts
- ▶ Training and Survey: Inform your employees of the date and time of the training and ask for a confirmation of presence

FEATURES

- ▶ Send alerts / messages via SMS, Voice, Email and Pagers
- ▶ Centralization of communications management
- ▶ Detailed Report of Deliveries, notifications and responses
- ▶ Availability of communication statuses (read, received, undelivered) in real time.
